## 3-Translate into urdu or Rewrite into Simple English the following paragraph:(8)

Fossil energy is another prime resource used for food production. Nearly 80 percent of the world's fossil energy is being used by the developed countries. The intensive farming technologies of the developed countries use massive amounts of fossil energy for fertilizers, pesticides, irrigation, and for machines as a substitute offer human labor. In developing countries, fossil energy has been used primarily for fertilizers and irrigation to help maintain yields rather than to reduce human labour inputs.
