- 2 You should not keep checking if the bleeding has stopped? Why?
- 3 What should your first aid kit consist of?
- 4 Why is it necessary to keep away soap from the wound?
- 5 What should you do if you are allergic to adhesive material used in most bandages?
- 6 When do you need to see a doctor?

Translate into Urdu: (10)

- 1 Rinse out the wound with clear water. To clean the area around the wound, use soap and a washcloth. But soap can irritate the wound, so try to keep it out of actual wound. If dirt or debris remains in the wound after washing, use tweezers cleaned with alcohol to remove the particles. If the debris still remains, see your doctor. Thorough cleaning reduces the risk of infection and tetanus.
- 2 Handling minor accidents at home or on the road develops a sense of crisis management. This may prepare people to tackle with unexpected emergencies with great confidence. Minor cuts and scrapes usually do not need to go to emergency room. Yet proper care is essential to avoid infections or other complications.
